

Short bio

Mature male who after receiving massage treatments decided that becoming part of the community offering massage & other treatments like reflexology was of great interest, so after many hours and courses became certified and started assisting those seeking assistance.

During these treatment sessions questions were asked and suggestions or suggestive remarks made relating to what other additions may be available to make their sessions more fun, so that's when adding a little extra to those seeking either a thrill, relief or some other reason of asking was added.

This is something that many other countries have been involved in for many years and ladies have been able to access.

So, feel free to see if help is at hand for you!!
